

# Manager, Infrastructure Advisory - infrastructure and project finance

Project Partners is a specialist infrastructure advisory firm providing commercial, financial and strategic support to government agencies and major private corporations in transport, energy, water and social infrastructure.

We seek colleagues who are committed professionals, who thrive in a creative team culture. We are committed to diversity in its truest sense and welcome infrastructure professionals of any cultural background or gender to apply.

**About the role:** We are seeking a skilled manager to join our commercial advisory team. As a manager, the candidate will be a senior member of our team managing the quality and accuracy of financial and economic outputs and will also work directly with our clients and stakeholders.

The successful candidate will be joining an experienced team and have skilled support, but should already have 'hands on' experience managing teams to execute advisory engagements.

**Role responsibilities:** Project leadership and management.

Staff management and development of two direct reports.

Variously lead or assist in client, stakeholder and market interactions eg market soundings.

Development of best practice project development, delivery and financing approaches for our projects. Provide disciplined quality review of team outputs.

**Role minimum requirements:** Bachelor's degree or higher in a relevant discipline, eg finance, economics, accounting, engineering etc

Strong applied understanding of financial and/or economic appraisal, sufficient to ensure quality of our methodology and the quality of team financial and economic outputs.

Experience in project analysis, project delivery and/or engagement leadership and management, experience in/with the public sector also desirable.

Ability to work well in a creative and fun culture, with good written and verbal communication skills.

**Application process:** We offer competitive remuneration and the opportunity to work on the most complex and exciting projects –directly with our clients and project stakeholders.
